Dear Complainant:

Thank you for your correspondence dated 12/27/2016 concerning Wilsons Wild Animal Park. Your concern has been issued number AC17-176. **If you wish to know the results of our findings, you must send a request, in writing, to our Freedom of Information Act office. Depending on the circumstances of the situation, please allow us enough time (30 to 60 days) to thoroughly look into your concerns.**

FOIA requests can be submitted three ways--

1. Email: foia.officer@aphis.usda.gov
2. Fax: 301-734-5941
3. US Mail: USDA, APHIS, FOIA
4700 River Road, Unit 50
Riverdale, MD 20737

Animal Care is the division of the U.S. Department of Agriculture (USDA) that is responsible for the enforcement of the Animal Welfare Act. The Act provides minimum standards for the humane care and use of animals at USDA licensed or registered facilities.

Animal Care inspectors conduct routine unannounced inspections at all USDA licensed and registered facilities to ensure that they are meeting or exceeding these minimum standards. Our inspectors also conduct searches for unlicensed facilities conducting regulated activities. We perform inspections and searches when necessary in response to valid concerns and complaints received from the public to ensure the well-being of the animals and compliance with the law. If violations are found, enforcement action appropriate for the circumstances will be initiated.

Please be assured that we will look into your concerns and take appropriate action if necessary.

Thank you for your interest in the welfare of these animals.

Sincerely,

Director
Director, Animal Welfare Operations
USDA APHIS Animal Care

Two Siberian lynxes snatched from a Virginia zoo

By Justin Wm. Moyer December 22 at 3:16 PM

Two Siberian lynxes were stolen earlier this week from a zoo in Frederick County, Va., authorities said.

On Tuesday, the owner of Wilson's Wild Animal Park in Winchester reported that two of the zoo's three Siberian lynxes were taken from their kennel between 6 p.m. Monday and 3:30 p.m. Tuesday, the Frederick County Sheriff's Office said in a statement.

The animals, worth \$4,000 each, are 10 months old, according to the statement.

[Sign up](#)

Zoo owner Keith Wilson said a male and a female were taken, and the female lynx left behind was quite upset.

"They grew up together, they've been together they're entire life,"

he said. “She’s upset that she’s not with the rest of them.”

Wilson said he acquired the lynxes a month ago and hadn’t named them yet. He said that Wilson’s Wild Animal Park, which has about 50 species, has been open for 40 years, but only experienced its first theft three months ago, when two lemurs and a spider monkey were taken — other “high-dollar” animals, Wilson said.

“These aren’t animals you would just pick up like a dog from the side of the road,” he said. “There’s a certain amount of knowledge needed to catch or capture them and care for them. . . . I’m pretty sure it’s a professional animal person doing this.”

Hunted for their fur, lynxes are also known for their hunting abilities and can spot a mouse from 250 feet away, according to National Geographic.

Re: Request for Investigation of Apparent Animal Welfare Act Violations at
 Wilson's Wild Animal Park (License No. 52-C-0038)

Dear Dr. Goldentyer,

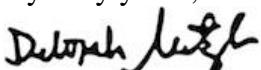

I am writing on behalf of PETA to request that the U.S. Department of Agriculture (USDA) promptly investigate Wilson's Wild Animal Park (WWAP; license number 52-C-0038), for the following apparent violations of the Animal Welfare Act (AWA), detailed in the attached appendix, which were documented by a concerned citizen who visited the facility on October 30:

- A lioness was limping and in apparent need of veterinary evaluation and treatment. *See [Video 1](#).*
- Two bears were confined to a barren concrete enclosure. One of the bears had worn pads on his or her paws. Bears can develop serious joint problems if they are not provided with an appropriate substrate. *See Photos 1–3.*
- The pig pen had exposed wire fence on the ground, which puts the animals at risk of injury. *See Photo 4.*
- A spider monkey was kept in solitary confinement, which can lead to severe psychological trauma for this highly social species. *See Photo 5.*
- Tigers were pacing, indicating that the space they are provided with does not adequately meet their species-specific needs. *See [Video 2](#) and [Video 3](#).*
- Inadequate drainage was documented in the tiger enclosure. This is an apparent ongoing problem at WWAP. *See Video 2 and Photo 6.*

Please ensure that all animals at WWAP are provided with adequate veterinary care, shelter, food, and water and are otherwise handled in accordance with the AWA. Please also hold the facility fully accountable for any violations that you discover during your investigation.

Thank you for your attention to this important matter. Please inform me of the complaint number that your agency assigns to this correspondence.

Very truly yours,

Deborah Metzler, M.S.

Appendix

a. Lame Lioness in Apparent Need of Veterinary Attention

The witness reported seeing an African lioness who walked with a slight limp (*see* [Video 1](#)). Please immediately inspect this animal, including her veterinary records, and ensure that she is receiving adequate veterinary care pursuant to 9 C.F.R. § 2.40.

b. Bears Confined to Small Concrete Enclosure

Two bears were confined to a small, barren concrete enclosure (*see* Photos 1 and 2). Inadequate substrate can predispose the animals to early-onset osteoarthritis and foot injuries—indeed, one of the bears appears to have significant wear to his or her foot pads of the hind limbs (*see* Photo 3). Wearing can predispose bears to painful blisters and ulcers, and these animals should be provided with appropriate natural substrate to ensure and maintain proper footpad musculoskeletal health.

Recognizing the health risks inherent in confining bears entirely on concrete substrate, a July 20 USDA inspection report of Pymatuning Deer Park (license no. 23-C-0019) stated that:

Black bears normally engage in postural behaviors of swimming, climbing, and digging. These bears have no ability to express these behaviors in this enclosure. The female is showing signs of debility consistent with being housed exclusively on concrete. ... This enclosure needs to be addressed and maintained to provide the opportunity for the bears to engage in species appropriate behavior.¹

The enclosure in which these bears are confined does not provide them with opportunities for the normal postural behavior of swimming, climbing, and digging, in apparent violation of 9 C.F.R. § 3.128, requiring that "[e]nclosures shall be constructed and maintained so as to provide sufficient space to allow each animal to make normal postural and social adjustments with adequate freedom of movement. Inadequate space may be indicated by evidence of malnutrition, *poor condition*, debility, stress, or abnormal behavior patterns" (emphasis added). § 2.131(d)(1) states that "[a]nimals shall be exhibited only for periods of time and under conditions consistent with their good health and well-being."

Please also inspect both bears and their veterinary records and ensure that they are receiving adequate veterinary care, pursuant to 9 C.F.R. § 2.40.

c. Pig Pen With Hazardous Wire Fence on the Ground

The witness observed and documented a section of wire fence on the ground of the pig enclosure (*see* Photo 4). This is a hazard that puts these pigs at risk of injury, in apparent violation of 9 C.F.R. § 3.125(a) (requiring that "[t]he facility must be constructed of such material and of such strength as appropriate for the animals involved ... and shall be maintained in good repair to protect the animals from injury") and also § 3.131(c) (requiring that facilities "shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart"). Furthermore, the wire on the ground prevents the pigs from rutting in the dirt, which is part of their natural repertoire of behavior and should be considered a basic welfare need, in apparent violation of 9 C.F.R. § 3.128.

d. Spider Monkey Kept in Solitary Confinement

The witness observed a spider monkey who was confined in isolation (*see* Photo 5). Monkeys have complex physical, social, and psychological needs. In the wild, spider monkeys live in complex fission-

¹*See* USDA Inspection Report, Pymatuning Deer Park, license number 23-C-0019, July 20, 2015.
17-01397_000035

fusion groups of up to 40 individuals. Without this necessary interaction with others of their kind, monkeys are afflicted with loneliness, boredom, and depression.

Confining primates in isolation violates 9 C.F.R. § 3.81, which states that exhibitors "must develop, document, and follow an appropriate plan for environment enhancement adequate to promote the psychological well-being of nonhuman primates," and § 3.81(a), which requires that "[t]he environment enhancement plan must include specific provisions to address the social needs of nonhuman primates of species known to exist in social groups in nature."

WWAP has been cited previously for its failure to implement an environmental enhancement plan for this solitary spider monkey in violation of 9 C.F.R. § 3.81 and failure to comply with *Id.* § 3.81(c)(4), which requires that special considerations be made for "[i]ndividually housed nonhuman primates [who] are unable to see and hear nonhuman primates of their own or compatible species." These are repeat violations that WWAP received on August 12, 2014,² and May 8, 2015,³ and they remain apparently uncorrected.

WWAP has continued to hold this spider monkey in isolation with no apparent justification. Pursuant to 9 C.F.R. § 3.81(e)(1), this type of exemption from the environment enhancement plan "must be reviewed at least every 30 days by the attending veterinarian."

e. Tigers Showing Signs of Psychological Distress

The witness observed and documented that tigers were pacing (*see* [Video 2](#) and [Video 3](#)). The repetitive stereotypical movements of these animals indicate psychological distress. Abnormal pacing behavior is likely caused by a lack of sensory stimulation and suggests poor welfare and suffering.⁴ This behavior is a sign that WWAP is exhibiting these tigers in apparent violation of 9 C.F.R. § 2.131(d)(1) and is likely not providing them with sufficient space, in apparent violation of 9 C.F.R. § 3.128. Wild carnivores are naturally far-ranging animals, and their stereotypic pacing—an "abnormal behavior pattern"—is a sign of stress.

As you investigate these apparent violations, please also inspect these tigers and their veterinary records and ensure that they are receiving adequate veterinary care, pursuant to 9 C.F.R. § 2.40.

f. Apparently Ongoing Inadequate Drainage in Tiger Enclosure

The witness observed and documented standing water and muddy conditions in the tiger enclosure (*see* Video 2 referenced above and Photo 6). These conditions appear to suggest longstanding drainage problems, in apparent violation of 9 C.F.R. § 3.127(c), which requires that "[a] suitable method shall be provided to rapidly eliminate excess water."

This is a persistent problem at WWAP, as it was cited on July 9, 2015,⁵ for failure to prevent excessively muddy conditions and standing water in the tiger enclosure. The inspector stated, "[m]easures must be taken to prevent the settling of an excessive amount of water. Additionally, a method to rapidly remove excess water from the enclosure must be established and maintained ... [c]orrect by July 30, 2015." This issue remains apparently uncorrected.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0036. The time required to complete this information collection is estimated to average .25 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

FORM APPROVED OMB NO.: 0579-0036

No license may be issued unless a completed application has been received (7 U.S.C. 2132-2143), and the applicant is in compliance with the standards and regulations Section 2133.
