Got an email from the state office. Here it is:

I just got a call from a (b)(6) in San Luis Obispo County at phone number (b)(6). She is concerned about foxes being trap and possibly killed

<http://www.sanluisobispo.com/news/local/article185138463.html>

https://m.facebook.com/story.php?story_fbid=1047511278721259&id=215984538540608

Got a FOIA request today for everything you did Fromm 11/10 to 11/17. You need to get your MIS caught up this morning. Make sure you record the damage to the chicken from that fox.

Ok

Call me

I killed the fox on the 9

So it won't be on there

Got another FOIA today too. Had a lady call wanting your name.
I told her I'm not going to give it out.

Ok

Sent from my iLeash

Good morning gentlemen,

One of the reporters that has been writing about the fox that was euthanized in Arroyo Grande asked how many fox calls we get in SLO County. Can you guys provide that info or send me to someone who can – I can't remember who the District Supervisor is? Thanks!

Subject: Fox heads up
Date: Tuesday, November 21, 2017 4:14:49 PM

Hey guys,

I have gotten a few angry stakeholder calls today re: the fox that was euthanized in Arroyo Grande. One of the callers, after telling me what an idiot I am, told me there is some petition and some sort of legal action that they are planning to take or working on... He didn't provide any further information on this, was much more interested in telling me how I didn't know anything about animal behavior and how he was furious that his taxpayer money paid for this. Regardless, I wanted to see if you guys knew anything about this and if not, give you a heads-up. ☺

Fox was not relocated.

It is illegal to do that in CA.

Also the fox was removed at the request of the resource owner after depredating chickens.

Subject: Arroyo Grande fox question

Hi! I'm a reporter with The Tribune in San Luis Obispo, and in one of our local towns we recently had a grey fox resident who was wandering around. It sounds though like the fox might have been relocated recently, and some people are saying it was by USDA's wildlife services. I wanted to check with you all to see if I could confirm that, or talk to someone who could tell me more about it. I couldn't find contact info for any local offices, so I thought I would try reaching out this way. Any help would be appreciated!

Thanks!

Subject: RE: Media request: fox killed in Arroyo Grande

I received one suggested edit from my supervisor and since I haven't heard anything from anyone else and it is about 5pm EST on a Friday, here is what I am going to send the two reporters:

Good afternoon. Your request for information regarding the fox that was euthanized in Arroyo Grande was forwarded to me. Wildlife Services responded to a request for assistance as a citizen reported a fox was attacking a killing her chickens. Unfortunately, due to state laws, the fox was unable to be relocated and had to be euthanized. The California Fish and Wildlife Department has an extensive campaign regarding the importance of not feeding wildlife called "Keep Me Wild". Often when wild animals are habituated to people, it is because they have been fed by humans. It's important for people to realize that these are wild animals and while they appear friendly, they are unpredictable, and may attack pets and small children. This is why we strongly recommend people do not feed wild animals.

Importance: High

I have another reporter asking for this information along with whether the fox was a male or female and how old the fox was. I spoke with someone earlier this morning (forgot to write his name down) and he said he couldn't tell how old the fox was based on the video and not sure if that's information we even normally get? Do we records age and sex of animals anywhere?

Subject: Media request: fox killed in Arroyo Grande

Importance: High

Gentlemen,

I wasn't to send this to the reporter requesting information regarding the fox killed in Arroyo Grande. Can you look it over really quickly and see if there is anything you think should be changed or added???

Good afternoon. Your request for information regarding the fox that was euthanized in Arroyo Grande was forwarded to me. Wildlife Services responded to a request for assistance as a citizen reported a fox was attacking killing her chickens. Unfortunately, due to state laws, the fox was unable to be relocated and had to be euthanized. The California Fish and Wildlife Department has an extensive campaign regarding the importance of not feeding wildlife called "Keep Me Wild". Often when wild animals are habituated to people, it is because they have been fed by humans. It's important for people to realize that these are wild animals and while they appear friendly, they are unpredictable. It is not uncommon for a wild animal that has become habituated to people to go from attacking pets to attacking small children. This is why we strongly recommend people do not feed wild animals.

Subject: San Luis County
Date: Tuesday, November 28, 2017 11:23:38 PM

On October 24, 2017 I received a call from a woman that claimed to have a fox in that was frequently in her yard. She stated that she had observed her neighbor feeding the fox and that it was harassing her chickens and rabbits. I advised that she should attempt to exclude the fox from her property, and eliminate food sources in her yard, as well as other general exclusionary advice I give every person that I talk to in regards to wildlife. Specifically, I told her to control the chicken feed, eliminate bird seed, other seed, and any fruit on the ground in her yard. I advised her that she would need to contact Fish and Wildlife to advise them that her neighbor was feeding wildlife and that they would be the ones to deal with that issue. I also advised her that if I was involved and trapped the fox it would be euthanized.

On November 8, 2017, I called the co-operator back and asked her what Fish and Wildlife had advised her of. She stated that they referred her back to me and that they never came out to her residence. She also reported that the fox had killed one of her chickens since the last time we spoke on October 24th. I advised her that I could bring her a trap to trap the fox. I also disclosed my normal disclaimer, that I do with all co-operators, including that if the animal was trapped it would be euthanized. I was able to bring her a trap that day. I explained how the trap worked and explained that when the fox was trapped she should call me so I could return to remove it. After the introduction to the trap and overview of the process, I advised her to call me in the morning if the fox was in the trap.

On November 9, 2017 I received a voicemail stating that the fox was in the trap. I went to the residence to retrieve the fox. I then euthanized the fox per protocol.

Regards,

(b)(6)
